PHILIPS

4-Head Video Cassette Recorder

Picture

4-Head, Double Azimuth Design

Combines direct drive cylinder and capstan motors with precision digital servo control to produce excellent special effects reproduction in Still and Slow modes in both SP and SLP speeds.

19 Micron Head

Introducing a dramatic improvement in videotape playback capabilities. You'll enjoy a significantly better playback in SLP mode and a remarkable playback in LP mode through specially-designed narrow heads which clear up onscreen picture noise.

Auto Head Cleaner

Gently, automatically cleans the video heads each time a tape is inserted or removed to maintain optimum picture performance during both recording and playback.

SQPB (S-VHS Quasi-Playback)

A revolutionary video playback technology that allows you to watch videotapes recorded in the S-VHS (Super-VHS) mode without buying expensive S-VHS equipment.

Digital Auto Tracking System

When tape playback begins, this feature automatically seeks the optimum tracking position in the tracking range, and the optimum audio signal tracking position for clearest picture and sound. Buttons on the remote transmitter give you manual control should tracking adjustments be necessary.

Convenience

Front Panel Audio/Video/Game Inputs

Enjoy the added convenience of recording tapes directly from a camcorder to the VCR portion with a full color monitor built-in. And as a bonus, accessory video equipment such as a video game, DVD Video player, or Web browser can be connected for direct playthrough to the TV section.

LED Function Indicators

Alerts you to the status of all important recording and playback features with simple, easily recognized, international symbols.

Bilingual (English/Spanish) Onscreen Function Display

Indicates record/playback functions, channel number, clock setting, date, counter, programming, one-touch record and record standby, keeping you alert to the status of all features in a heads-up onscreen display.

Onscreen Real-Time Counter with Time Search

Unlike the 0000 to 9999 tape counters found in standard VCRs, this unit incorporates a linear, real-time counter which shows elapse time in hours, minutes, and seconds.

Front Panel Menu Access

Access most menu operations conveniently and quickly through the front panel of the VCR.

Special Effects

Slow Motion

View SP or SLP video recordings in slow motion in both forward and and reverse modes.

Still Frame

Freeze the video at the touch of a button for a smooth, clear image.

Remote (Remote # N9216UD)

VCR/Universal TV/CBL/DBS Remote with Glow Buttons

Multifunction infrared remote controls all operating features and functions of this Combi, plus select functions of most Philips, Magnavox, and some competitive brand television sets, as well as some cable converter/decoders, and standard features of Philips, Magnavox, RCA, and Sony digital broadcast satellite receiver. Change channels fast with the numeric direct access keypad and heads-up onscreen display for confirmation.

Full Feature Auto Package

- Power On
- Digital Auto Tracking
- Auto Play
- Auto Repeat
- Auto Rewind
- Auto Eject
- Auto Power Off
